4. Reviewing this assessment

- Initial review – within 12 months of the effective date
- Periodic reviews – at least every 12 months

This assessment will be reviewed on an ad-hoc basis where triggers indicate a risk to Consumer Duty outcomes, including fair value, customer understanding, customer support or foreseeable harm.

Triggers may include Management Information (MI) trends, complaints, indicators of customers financial hardship, early product termination, distribution issues, or regulatory change, guidance or instruction.

5. Customers with characteristics of vulnerability

The product is designed for customers with impaired credit profiles and, as such, is likely to include some customers who have characteristics of vulnerability or who may experience vulnerability over time.

Applicants who are in this lending area are likely to understand mortgages or the mortgage market with some applicants being existing homeowners unless the applicant is a first-time buyer and then may need additional guidance in this area. However due to the nature of these products, they may require additional advice and support to ensure they understand the information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring. If an applicant is remortgaging for debt consolidation reasons both options need to be considered i.e., the cost of clearing the debt over the term vs the cost of leaving the debt outstanding. As these applicants will have minor credit issues there still may be other options to help that should be consider i.e., arrangement with current debtors to reduce payments. With debt consolidation the society clears the debt for the applicants on completion this ensures that the debt is repaid and not relying on the applicants having to do this.

We consider the needs, characteristics, and objectives of customers with characteristics of vulnerability at all stages of the design process for this product to ensure the product meets their needs. Our manual underwriting approach allows the DIP and underwriting team to satisfy any concerns that they have around the applicants understanding of what they are agreeing to. With all Impaired cases an explanation is required as to what happened for the applicant to have credit issues, as part of the process this will be reviewed to ensure that we feel as a society that by proceeding we are helping the applicants and not adding to the debt issues and to establish if any further support may be required. Independent Legal Advice may be a condition of the offer, to ensure that all parties are aware if any debt consideration is being considered

We have in place a framework to achieve good outcomes for vulnerable customers, which includes:

- Education and training for our staff to ensure they have the appropriate skills and experience to recognise and respond to the needs of vulnerable customers.
- Suitable customer service provision and communications.
- Flexible policies, where appropriate, to support vulnerable members.
- Monitoring to ensure we continue to meet and respond to the needs of customers with characteristics of vulnerability.
- Accessible tools on the website to help – Recite me
- Conduct risk monitoring.
- Monitoring and review of product launches to ensure the product is appropriate and matches the approval brief.
- The society take care when interacting with vulnerable borrowers by using the TEXAS protocol.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.

6. Our assessment of value

We have developed a comprehensive and robust assessment process which evaluates several aspects of our business to determine the value of our mortgage product. This analysis is used to ascertain whether the Product delivers fair value for customers.

The mortgage pricing model takes into account the following inputs; proposed product price and fee, product tranche size, cost of funds, direct origination costs (adjusted by niche based on its operational complexity), Origination fees (PROC and MIG as applicable), wider operating costs, expected credit risk cost and risk-adjusted capital require (adjusted by lending category), plus assumptions around loan sizes and expected LTV distributions based on recent lending benchmarks.

Not all fees are included within the fair value assessment, as certain charges are not directly associated with the mortgage loan and are applied consistently across all products. As such, these fees are not considered a cost specific to the mortgage. Full details of applicable fees can be found in the Society's Tariff of Charges. [Mortgage Tariffs and Fees \(82\).pdf](#)

The assessment follows a detailed and robust product approval process which determines the outcome including market analysis, products been checked via the pricing model and intermediary feedback. Smart Money Feedback is also reviewed to help determine the correct outcome.

The outcomes of the assessment process are presented to Mortgage Product Committee and Management Assets & Liabilities Committees for approval allowing for challenge and further investigation before we sign-off the outcomes and share the summary of our assessment with you.

Our fair value assessment has considered the following:

Benefits	Price	Costs	Limitations
The range of features that the product provides, the quality of the product, the level of customer service that is provided and any other features that the product may offer.	The interest rates, fees and charges customers pay for the product, comparable market rates, advice fees paid to intermediaries and non-financial costs associated with operating the Product.	The cost of funding the Product and any other reductions in costs to the customer made possible by economies of scale.	Any limitations on the scope and service we provide or the features of the product.

Below is an example of the information reviewed and taken into consideration when completing the assessment:

- Product performance
- Operational performance
- Product governance
- Fees and charges (Product) subject to annual review and governance
- Customer experience insight and data
- Customer outcomes testing
- Customer complaints
- Product risk assessments
- Colleague education and training
- Customer in Vulnerable Circumstances Policy

Results of our assessment
